

# Value Lists API

In order to create a value list you first have to create all the values that you want to add to the list as described here: [Add Values to Key](#), and you have to have the id of the key that you want to add the values to.

## Creating a Value List

### SDK

Use tab completion with SDK to auto-complete function names or show field options!

```
n/a
```

### REST API

*POST /api/v0/value\_lists*

#### Headers

```
Content-Type application/json
Authorization "yourAuthToken"
```

#### Body (example)

```
{
  "name": "My Value List",
  "key_id": "456",
  "value_ids": [51643,51644,51645]
}
```

Required parameters: name, key\_id (the id of the key you want to add the values to)

#### Response

Status code 200

```
{
  "id": 321,
  "name": "my_value_list",
  "description": null,
  "account_id": 391,
  "key_id": 456,
  "free_values": [],
  "value_ids": [51643,51644,51645],
  "created_at": "2019-07-12T16:49:50.754Z"
}
```

## Get a Value List

### SDK

```
n/a
```

## REST API

GET /api/v0/value\_lists/<id>

### Headers

```
Content-Type application/json
Authorization "yourAuthToken"
```

### Response

Status code 200

```
{
  "id": 321,
  "name": "my_value_list",
  "description": "",
  "account_id": 391,
  "key_id": 456,
  "free_values": [],
  "value_ids": [
    51643,51644,51645
  ],
  "created_at": "2019-04-30T15:26:00.605Z"
}
```

If you want to add new values to the list you have to replace all the values in the list.
